## ABOUT THE PROJECT

Demand for top-notch healthcare facilities is booming in the Middle East and time is at a premium. In less than two months, DIRTT delivered a clean, functional and modern intensive care facility with 25 ICU rooms. In the North American market, where projects of this scope take seven to eight months to complete and ICU rooms generate \$4000 per night, DIRTT potentially saves \$18M in hospital revenue - with a better quality and highly sustainable solution. The country's governing health body was so impressed with DIRTT's healthcare solution that it will be used as the standard in future ICU projects.

## SOLUTIONS

- Solid Walls
- Combination Walls
- Curtain Walls
- Millwork
- Healthcare Gasket (medical specific)
- Level 2 Modular Power (medical specific)

## FINISHES

- Back Painted Glass
- Write Away
- Thermofoil
- Electronic Switchable Privacy Glass
- Chromacoat
- Anodized Aluminum

## INTERIOR DESIGN

NMG

## DISTRIBUTION PARTNER

NMG
