ABOUT THE PROJECT

When this rapidly growing tech company outgrew its global headquarters in Silicon Valley, they chose a 40,000 sq/ft space in San Jose—a location with better lease rates, but not considered a draw for the best Valley employees. So... now to create a great space in an existing building, worthy of trumping the unorthodox location. The CEO directed the design team to produce a vibrant, open and tech-savvy space. With just 60 days from initial design until move in, DIRTT delivered for them. Media Walls with integrated technology such as 80 inch LED TVs and iPad docks meld with DIRTT Walls from the previous space, and modular power throughout means the space can easily adapt to future growth.

PRODUCTS

- Solid Walls
- Glass Walls
- Combination Walls
- Media Walls
- Pivot Doors with 4" Stiles
- Modular Power

FINISHES

- Back Painted Glass
- Chromacoat
- Write Away
